- Hardened API integrations and streamlined front-end performance for stability on mobile and desktop.

Valueonshore ('VOS') Advisors

Freelancer

Nov 2024 to Jan 2025

Remote

- Built a valuation model with a team of developers to enhance financial forecasting and developed an automated report generation feature to streamline annual financial reporting.

PROJECTS

Flight Ticketing System Project

- Built a booking web app with user registration, profile management, and an admin panel with real-time updates reducing manual workload and improving operational efficiency.

ERP Model,Project

- Developed an ERP module to manage student records and attendance; implemented role-based access control and a real-time notification pipeline to streamline communication across users.

Business Evaluation Model, Freelancer Project

- Created an enterprise valuation tool using DCF, market comparables, and precedent transactions, improving analysis accuracy by 20 percent and enabling scenario-based sensitivity modeling for better forecasts.
